# 2024 Workshop Program
## Canadian Bioinformatics Workshop Series

**REGISTRATION AWARDS AVAILABLE**

## Introduction to R

### Date
June 11-12, 2024 - Toronto, Ontario

### Faculty
Frances Wong

### Course Description
R is one of the most important scripting languages for both experimental and computational biologists. It is well-designed, efficient, widely adopted and has a very large base of contributors who add new functionality for all modern aspects of data analysis and visualization. Moreover, it is free and open source. However, R's great power and expressiveness can at first be difficult to approach without guidance, especially for those who are new to programming. This workshop introduces the essential ideas and tools of R. Although this workshop will cover running statistical tests in R, it does not cover statistical concepts.

### Sponsors

OICR — Ontario Institute for Cancer Research

GenomeCanada

Ontario Genomics

HPC4Health

Canadian Centre for Computational Genomics
