INTRODUCTION TO R

Canadian Bioinformatics Workshops

📅 October 01-02, 2025
📍 Montréal, Québec

💲 $525 + tax before August, 01
💲 $725 + tax until September, 18

👤 In-person event
🏅 Awards available

Course description

R is one of the most important scripting languages for both experimental and computational biologists. It is well-designed, efficient, widely adopted and has a very large base of contributors who add new functionality for all modern aspects of data analysis and visualization. Moreover, it is free and open source. However, R's great power and expressiveness can at first be difficult to approach without guidance, especially for those who are new to programming. This workshop introduces the essential ideas and tools of R. Although this workshop will cover running statistical tests in R, it does not cover statistical concepts.

What will I learn?

By the end of the course you will be able to:
- Meet the challenges of data handling
- Break down problems into structured parts
- Use R syntax, functions and packages

OICR Ontario Institute for Cancer Research

CONSORTIUM SANTÉ NUMÉRIQUE

IVADO
